The attached email has the GE results and sample locations. Note that this is only wet deposition. The concentration in rainwater is comparable to what the LWG saw in stormwater runoff from Forest Park.

On a side note, last week I suggested to Kristine Koch at EPA that she see if they can add PCBs to the air monitoring work EPA is doing at schools. Kinda doubt that'll go anywhere though.....

We have some data sources for this in PH but it's limited. Karen, perhaps you could forward that around (from the GE site)?

I don't see anything on this agenda about atmospheric deposition of PCBs from diffuse global sources (both legacy & current use (as not everyone has banned PCBs)). Not at least acknowledging and discussing these could lead to ineffective strategies and unrealistic expectations for clean-up.

**Subject:** FW: PCB Workshop Date, Proposed Agenda, and Planning Team

This is a heads-up email that EPA, Mary Lou Soscia, will be organizing and hosting a PCB workshop for the Lower Columbia / Willamette River, see attached proposed agenda. Several of our toxics stakeholders have expressed interest in this workshop such as ACWA, PPA, Willamette & Columbia River Keepers, and several Tribes.

This workshop is in support of EPA's Columbia River Toxics Reduction Strategy and will be held in Portland on June 30, location to be determined.

As soon as a final agenda is available, I will send it out to this email group.

At this point EPA is seeking our input on the agenda and would also appreciate some volunteers to help out on the planning team for the workshop. See Summer's email below. I believe Kevin has provided input already.

Hello Columbia River Toxics Reduction Working Group

We have set the date of the PCB workshop for July 30 in Portland. The agenda is coming together (see attached). We would like your input on the agenda and would also appreciate some volunteers to help out on the planning team for the workshop. If you or someone on your staff can help out with this, please let me know. We will have our first planning meeting the week of June 15th.

(See attached file: Draft PCB Workshop Agenda\_June4.doc)
